

Milestone 3 review summary CSC 648-848 Fall 2019 Sec 2

Team: #11

Date: Nov 21st 2019

Summary of feedback and tasks to do

Overall the feedback was positive with some specific tasks that need to be fixed. Branch organization could be improved to reduce the number of unnecessary branches and to better utilize our branches to reduce possible merge conflicts. The team git messages need improvement in order to add more clarity about what the changes being pushed are. Our comments in the header section of files also need improvement. Some of the tasks that need to be finished before the deadline is to finish our selling and posting pages. In addition to the pages, we need to connect them to our backend to make them functional. We are polishing up our unique feature which is our textbook search feature. When we finish those, we will finish our user dashboard which includes listing posts and user messages. After all of that we will start to polish and optimize our website with an auto thumbnail generator and making sure all the pages work 100% of the time on any browser size.

List of tasks the team chose to focus on and implement

- Login/Registration
- Textbook Search
- Posting/Selling item
- User Dashboard
- User Messages

- Filter for search page
- Admin Dashboard
- Thumbnail auto generation

List of P1 functions agreed at the meeting

- Login/Registration
- Textbook Search
- Posting/Selling item
- User Messages
